Results-driven developer with a proven track record in creating responsive web applications. My unique value proposition lies in my multifaceted skill set, encompassing roles as a *Scrum Master* and *System Analyst*. This dual expertise equips me to bring a holistic perspective to software development. I am committed to applying my knowledge with cutting-edge technologies, driving innovation, and seeking opportunities to make a positive impact in software.

HTML5 **|** CSS3 **|** JavaScript/JS6 **|** Bootstrap **|** React.js **|** Node.js **|** Express.js **|** PostgreSQL **|** SQL **|** GitHub **|** Jira **|** Visual Studio **|** Agile Methodologies (SCRUM-XP) **|** Cypress **|** MultiCloud concept **|**TDD Concept **|** DevOps Mindset **|** Remote Collaboration tools **|** Presentation **|** Adaptability **|** Teamwork **|** Problem-Solving **|** Dependability

Professional Experience

<u>Full Stack Developer</u>
Animal Charity-Decision Making Framework, UK
Mar 2023 - Apr 2023

Collaboratively developed a full-stack framework for an animal charity organization. Using a range of technologies such as React, CSS, Bootstrap, JavaScript for the front-end Node.js for the back-end, and PostgreSQL for the database, and automated test with Cypress, and also use NodeMailer for sending email via a third-party email server.

Achievements:

- Simplified the framework for the client on their website in 4 weeks, with very positive feedback from the client.
- Created an interactive application for a charity. Handover included 6 hours of meeting and maintenance training and documentation. (Application website)

<u>Business and Tech Analyst</u>
Barclays and Capgemini-Circular Economy, UK
Nov 2022 - Mar 2023

Designed a business plan and technical solution to address sustainability and circular economy for the Barclays mobile application.

Achievements:

- Achieved a 75.28% reduction in carbon emissions by issuing virtual cards via sustainable practices within the Barclays mobile app.
- Achieved successful collaboration within a multidisciplinary team.

<u>Scrum Master, Project Manager</u>
Saman Electronic Payment Co, Iran
May 2014 - Oct 2019

Managed and coached cross-functional teams including developers, testers, and product owners to ensure activities were based on project baselines. Established and executed successful mobile-based payment gateway and payment service projects, analyzing and modifying development to meet client requirements and business needs.

Achievements:

- Successfully delivered 85% of overall project milestones on time, leading to a 15% increase in client satisfaction and retention.
- Implemented Continuous Integration (CI) pipelines based on the DevOps concept, resulting in a 30% reduction in deployment time and enhanced software quality.

<u>System Analyst</u>
Infotech Co, Iran
Oct 2010 - Apr 2014

Conducted feasibility studies for Web-based applications and systems using Rational Unified Process (RUP) methodology. Constructed, maintained, and updated technical documentation for software and systems.

Achievements:

- Improved the Software Development Life Cycle (SDLC) by identifying application design flaws and optimizing the process, resulting in a 20% reduction in development errors and increased project efficiency.

Education

CodeYourFuture, UK—Full Stack Web Development degree
Oct 2021 - Apr 2023
Learned to build dynamic and responsive web applications using technologies such as HTML, CSS, JavaScript, React, Node.js, PostgreSQL, and GitHub

Qazvin Islamic Azad University, Iran — Master in Software Engineering
Jan 2013 - Aug 2016
Master's degree in Software Engineering, with a thesis focused on *"improving quality characteristics in service-oriented self-healing systems using BDI agents as an approach"*.

Shahab Danesh University, Iran — Bachelor in Software Engineering
Sep 2008 - Aug 2010

Projects

Full Stack Developer
Content Management Application, UK (*Jun 2023- Aug 2023*)

- Designed a tool to streamline resource management and tracking.
- Built using React.js, Next.js, and Simple Express API, styled with Bulma.
- empowers users to effortlessly add, update, and activate resources, each with a completion timer.
- I used the SSR technique to improve user experiences by rendering content on the server before it reaches the client.
- Live demo: https://content-management-app-pi.vercel.app/

Volunteering

Retail Assistant
Children Society Charity Shop, UK (Dec 2021- Apr 2022)

Barista
Mustard Tree Coffee Shop, UK (May 2022)
